

CRETEGUARD

An Economical and *Fast Drying* Architectural Coating to Beautify Old or "Tagged" Concrete.

CreteGuard is a single package, water dispersed, polymer modified, mineral filled, colored, architectural coating designed to restore the appearance of aged concrete surfaces. CreteGuard can provide waterproofing protection from the elements when applied in moderate spread rate quantities and is an excellent covering for graffiti. Comes in a variety of gray colors.

ADVANTAGES:

- Good curing at modest temperatures; same-day opening to traffic.
- Non-hazardous in cured form; therefore, municipal land fill safe.
- Dries tough and launders well. Clean with mild soap. Hose rinse.
- Can be applied on surfaces that have mild deposits of oil/grease.
- Cost effective versus other coatings such as epoxy.
- Little to no odor makes it great for indoor applications.
- May be applied on most aged concrete.
- Can be rolled & sprayed as an excellent graffiti covering.
- Architectural coating to improve the appearance in aged traffic surfaces.
