MINI-ROADWELDER

- ✓ Water Cleanup
- ✓ Minimum Energy Costs
- ✓ Fast Start-up, Fast Production
- ✓ Save \$\$\$ = fewer man hours than hot-pour, better production than hand-pour
- ✓ Inexpensive system - Stretches your equipment \$\$\$
- ✓ Can be used to apply other Carbonyte products.

MINI-ROADWELDER OPTIONS:

- Interchangeable Tip Set (Spray Applications)
- Surge Suppressor Teflon Diaphragm (Recommended when Spraying Carbonyte Surface Treatments)
- 5.5 Hp, Gas Driven Compressor

ROADWELD

- Cold-Applied
- Truly Pourable
- Seals as well as fills
- Minimum Shrinkage due to Xerithane Technology
- Stays Pliable in Cold Weather
- Flexible in Severe Sub-Freezing Temperatures
- Doesn't Track in Warm Weather
- Tenacious Adhesion to Crack Side Walls
- Smaller Crews to Apply
- No Routing Required
- Less Equipment needed to Apply
- May Apply in Damp or Cold Conditions
- No Hot-Kettle Liability Exposure

GATORGUARD

Firm-Grade & Flex-Grade

ADVANTAGES:

- Fraction of Cost as Compared with New Asphalt
- High build single pass coverage
- Tenacious Adhesion, will not Delaminate
- Restores Asphalt to Monolithic Substrate
- Binds Together Individual 'Cobble' and Keeps it from Eroding to Dreaded Potholes
- Contractors limited to seal coat only repairs can now participate in jobs typically requiring removal and replacement of asphalt cement.
- Non-hazardous in cured form; therefore, may be disposed as cured residue into any municipal landfill.
